

Industry: Construction
 Use Case: Employee Training, Sales Training, Service & Support Training

INTREC creates **targeted learning approaches** with SAP Litmos

INTREC is a privately owned Australian company, specialising in construction, commercial fitout and building refurbishment. Founded in 1996, INTREC has established a reputation for outstanding service, quality and reliability. They chose SAP Litmos because it's crucial that their workers, who are often on remote work sites, can learn on the go. With SAP Litmos' mobile optimization, it gives workers the capability to complete their training on their daily commute.

Previously INTREC had been using another LMS that limited their ability to create targeted learning paths for workers. SAP Litmos allows INTREC to now deliver targeted learning for each construction team across multiple Australian locations, with around 80 percent completion rates. These completion rates make it easy to track with SAP Litmos, making it effortless for INTREC to address knowledge gaps.

"We use SAP Litmos because it's a tool that lets us use targeted learning approaches. It's a great tool because it simplifies everything down to a point. You can create just about anything that you need to meet a certain training point. It's delivered effectively and quickly."

- Matt O'Connor, Compliance Advisor

Enhanced onboarding

INTREC has reduced the time needed to roll out induction training and can accurately track completion rates to address knowledge gaps sooner

Mitigating risk made easy

INTREC can address high-risk incidents quickly and proactively by pushing out refresher training and increasing workers' awareness around future risk

Improved training effectiveness

Internally produced videos and training can be quickly implemented with SAP Litmos, keeping INTREC workers' knowledge up-to-date
